S: silhouette; R: RGB; CL: clothing change; “–”: not reported in the selected comparison. Part A uses BiggerGait Table 1, GaitMax Table 3, and DenoisingGait supplementary Table 9. BigGait and BiggerGait use DINOv2-S (ungrouped BiggerGait); DenoisingGait uses a Stable Diffusion prior; GaitMax uses pretrained visual features and GCaption supervision. *Resegmented CASIA-B; [‡]GaitMax retains its source’s CASIA-B label. [†]Custom GREW subset: 1,000 identities, 1,000 query and 4,095 gallery sequences. Results follow each reporting source’s preprocessing and evaluation settings.
